Use the internet to contact family from beyond the grave!

As if it wasn't amazing enough that technology can keep us in touch with friends and family all over this world, it can now bring us close to relatives in the next.

With ***Your Family Tree Online*** it is easy to trace your ancestry from the comfort of your own computer. Author Graeme Davis shows you how to access your family tree from anywhere in the country so you don't have to make a special trip to a capital city to check the national records.

Whether genealogy is a hobby or your research to track down a relation, Davis shows you how you can devote as much or as little of your time as you wish and still get results.

Commenting Davis says, *"This guide is for anyone who wants to research a family. I show you how to find your way through a mass of online sources to discover more about your family history. You can see how your ancestors lived and how they fitted in with their age and you can draw up a family tree. In short, you can become a genealogist!"*

In this essential guide you will also learn how to upload your results to the internet, both to preserve your family's heritage and to connect with relatives, so that you can exchange photos and reminiscences.

About the author: Graeme Davis is a university lecturer and a professional researcher with extensive experience of family tree research, both online and off. As materials developer for a university level genealogy course he is familiar with the records needed by online researchers. A writer for *Your Family Tree* magazine, he is also developing new tools to aid the genealogist.

Your Family Tree Online is published by **How To Books Ltd**

www.howtobooks.co.uk, and is available at \$20.00 in major bookshops and online retailers across the country. ISBN 9781845283445
